

St. Francis` High School, Peshawar

Homework

Class: 4

Subject: General Science

Unit – 1

Characteristics and life processes of organisms

Short Question / answers

Q.2 What type of stem does a pomegranate tree have and how does it reproduce?

Ans. A pomegranate tree has a woody stem. It produces flowers which have seeds. These seeds grow into new plants.

Long Questions / Answers

Q.1 Define vertebrates and invertebrates.

Ans. Vertebrates:

Vertebrates are animals that have a backbone or spinal column.

Human beings are the example of vertebrates.

Invertebrates:

Invertebrates are animals that do not have a spinal column. Invertebrates have a hard-external covering like a shell or no hard covering or skeleton at all.

Insects are the example of invertebrates.
